-FOR IMMEDIATE RELEASE-

Ace Computers/Ace Digital Home Joins Dolby® Laboratories in showing Industry's first Intel® Viiiv™ Platform systems with Dolby® Master Studio™ Technologies for the industry's richest audio entertainment experience.

LAS VEGAS, Jan. 5, 2005 —Ace Computers/Ace Digital Home announced today along with Dolby® Laboratories that their new LHD™ Limited Professional Media Server is one of the first two systems that fully support Dolby® Master Studio™ technologies. The system is among 6 new systems launched by Ace that has been approved for the Dolby PC Entertainment Experience.

The Ace® LHD™ Limited, a CES “Best of Innovations” Award winner, resembles a living room A/V component and fits easily into a home entertainment system as well as an A/V rack in a standard 4U form factor. The system features the Dolby Master Studio Suite of technologies including Dolby Digital EX, Dolby Digital Live, Dolby Pro Logic® IIx, Dolby Headphone and Dolby Virtual Speaker, with support for up to 7.1 channels of surround sound. These technologies combine advanced audio rendering with flexible controls and powerful digital signal processing to give consumers a tailored listening experience.

“We believe that systems like our LHD™ Limited based on Intel® Viiiv™ technology will be the new standard for delivering a great digital entertainment experience in the home in the future and Dolby's position as the leader in audio standards and technologies will be absolutely critical to gaining broad-based acceptance of these newer technologies,” said John Samborski, CEO of Ace Digital Home. “Ace looks forward to our continued collaboration with Dolby and its PC Entertainment Experience initiative in delivering entertainment platforms that support the most advanced surround sound technology for PCs available.”

“Dolby is focused on extending the CE sound experience to the PC, which is evolving into a key digital entertainment platform,” said Greg Rodehau, Director, PC Business Unit, Dolby Laboratories. “The Intel® Viiiv™ platform will help deliver on this vision. Consumers can now enjoy a digital home experience, including a high-quality audio experience from Dolby.”

To demonstrate the system, Ace and Dolby have the system on display in numerous locations on the show floor at the Consumer Electronics Show held in Las Vegas, January 5 through 8, 2006 including booths by Intel® and ATI® in addition to Dolby's and Ace's booths on the show floor.

Ace also has announced three systems that are approved for Dolby® Home Theater™ level technologies, the LHS II series for those looking for a more affordable experience. All the systems are available immediately and will offer many benefits to consumers looking for the richest media experience ever.

About Ace Computers/Ace Digital Home

Ace Computers' was founded in 1983 and its headquarters are in Arlington Heights, Illinois. Ace is seasoned IT player and is a VAR Business “Top 500” member, ranked as the 16th largest system builder in the nation and has won numerous awards for design and implementation from various sources including CEA, Gartner, Intel, NASBA and more.
